Ajay kumar

.NET || Azure/AWS || IoT || Cross Platform Apps
Delhi, India

Summary

Passionate about crafting innovative solutions that drive business success, I bring extensive experience as a Senior Software Development Consultant. Specializing in .NET Core and its associated technology stack, I excel in architecting robust and scalable systems that meet the dynamic needs of modern businesses.

My proficiency extends to leveraging the power of Azure and AWS cloud platforms to develop resilient and highly available applications.

With a strong background in cross-platform mobile app development using Xamarin and Ionic, I ensure seamless user experiences across diverse devices and platforms.

My UI skills, grounded in React, enable me to create intuitive and visually appealing interfaces that enhance user engagement and satisfaction. I have a deep understanding of microservices architecture, enabling me to design modular and maintainable systems that can evolve with changing business requirements.

Committed to delivering top-notch quality, I adhere to Test-Driven Development (TDD) practices, ensuring code integrity and reliability throughout the development lifecycle.
